

Instant Details for Lookup Fields

Data Aquarium Framework provides powerful data lookup capabilities. We have extended them one step further by offering *instant details* for lookup fields.

Navigate to http://dev.codeontime.com/demo/nwblob, select *Products* in the drop down in the left top corner and select any product. Notice that an arrow is displayed next to *Product Name* field. The view component has detected that Product Name is defined as a lookup field and displayed an *instant details* link.

OrderDetails	•				
This is a list o	f order details.				
New • Ac	tions •				
Order Customer#	Product Name	Unit Price	Quantity	Discount	Order Customer Company Name
VINET	Queso Cabrales	\$14.00	12	0	Vins et alcools Chevalier

Notice that *instant details* arrows are also displayed next to *Supplier Company Name* field and *Category Name* field. Follow category name link and the next level of details is presented.

You can rename the category, change description or upload a new image. As soon as you save the changes or click on *Close* button you will returned back to the product *instant details*. Click *Close* button on *products instant details* and you are back on the page with the order details.

In just a few clicks you can jump straight to the details of the lookup data and make necessary adjustments or research. The same details preview is available when you jump to item details displayed in RSS data feeds of your *ASP.NET* web application.
